

A vertical column of five yellow stars of increasing size from top to bottom, positioned to the left of the text.

TEDDY is an independent multidisciplinary and multinational network encompassing partners from 15 countries aimed at facilitating the performance of good quality paediatric studies and research.

TEDDY is recognised member of Enpr-EMA, the European Network of Paediatric Research at the European Medicines Agency.

TEDDY challenging objectives

-  **To implement good practices and tools to develop studies and research on medicinal products in children in compliance with EU legislation and guidelines.**
-  **To promote, participate or provide methodological expertise to set up, manage and conduct paediatric clinical trials and other paediatric research.**
-  **To plan and develop paediatric national or multinational clinical trials and paediatric studies.**
-  **To collaborate with existing paediatric networks and research organisation in the framework of the Enpr-EMA (the European Network of paediatric research at the EMEA) and other International initiatives, such as GRiP, the FP7 project aimed at promoting Global Research in Paediatrics.**
-  **To develop informative tools (tailored to industries, public agencies, researchers, health professionals, ethics committees and patients/parents organisations) in order to favor awareness on the topics of paediatric research.**
-  **To develop communication and educational tools tailored for children in order to facilitate their participation in experimental procedures.**
