

## Feedback Exercise on Symptom Questionnaire for

### Juvenile Idiopathic Arthritis

#### Introduction

As part of this exercise, we're asking you to review a questionnaire designed to gather information on symptoms experienced by adolescent and pediatric patients with juvenile idiopathic arthritis.

After reading through the questionnaire, we'd like you to give us your feedback by answering the questions below.

Please think about how easy or difficult it is to understand and consider any improvements that could make it clearer and more engaging for young people.

Your feedback is important to help us understand how well it works for young people. Thank you!

1. Do you think the questionnaire includes all the important information to understand and explain the symptoms of adolescent or paediatric patients? Is there anything else you think should be added?

Funded by the Swiss State Secretariat for Education, Research and Innovation (SERI).

Funded by the UKRI Innovative UK under their Horizon Europe Guarantee scheme.

2. Since the questionnaire currently has no images or graphics, do you think adding some visual aids or more engaging graphics could make it easier to understand and more interesting to complete?

3. Is the language in the questionnaire easy for someone your age to understand? Are there any parts that seem confusing or that might need a bit more explanation?
