

TEDDY Working Group on Off - Label Uses Mitigation

Working Group Chair:
Lucia Ruggieri

TEDDY WG on Off - Label Uses Mitigation aims to properly address the specificities of off-label medicines in paediatrics. This WG is in charge to to properly address the theme of paediatric off-label medicines use at European level, starting from the existing or under development best practices and tools developed by TEDDY and other research groups in Europe in support of a safer use of medicines for children.

This is done mainly through collaborative research projects, training and advocacy activities, and scientific publications.

Mission

To develop targeted actions addressing paediatric off-label medicines use across Europe building on existing best practices and collaborative research to support safer medicines for children.

Objectives

- Promote safer and more appropriate use of off-label medicines in children across Europe.
- Develop evidence-based actions and recommendations grounded in current research.
- Share best practices and tools developed by TEDDY and partner research groups.
- Support research, policy initiatives, and advocacy at European level.
- Address gaps where adequate paediatric studies are lacking for long-used medicines.

Main Activities

- Review relevant literature, guidelines, and policy documents on paediatric off-label medicines.
- Monitor EU legislative developments and engage with the evolving HTA framework.
- Contribute to relevant public consultations and engage with EMA and other stakeholders initiatives.
- Participate in collaborative research initiatives for understudied paediatric medicines.
- Work in synergies with other networks and initiatives to define research priorities in paediatric medicines development
- Disseminate findings through training, advocacy, and publications.

Benefits for Participants

- Access to a pan-European network of researchers, clinicians, and regulators in paediatric medicines.
- Early insight into EU legislative and policy developments on off-label use.
- Opportunities to co-author scientific publications and contribute to guidelines.
- Involvement in collaborative research projects and funding calls.
- Platform to share expertise and influence paediatric medicine policy at European level.
- Stay updated through curated literature reviews and expert discussions.

How to Join the Working Group
